**Subject:** schedule for review

Ed,

Per the message that I sent everyone else, please stagger the review of the documents, starting with the gamma cap. Also, assuming few comments, write them as directives so that we can approve the document with changes rather than go through another iteration. Barbara and company may want to have a conference call on these. I told her my concerns with a single strategy. Her suggestion is that they will add an additional lift if needed as a field change.

kevin
